Forecasting Model  
Campaigns  
Actual, Optimized and  
Shadow Costs

**COMMUNICATION**

Real-time Spectrometer data  
ERP Interfacing  
Shared through your server  
Individual Work Station

**DEMO**

Upon request

- ABS is proven and supports several large scrap and trader firms.
- Whether it is mixing materials to make up a charge for a customer or buying to supplement future orders, ABS will offer the lowest cost alternatives.

ABS Software™ is customized for the brokerage industry. Whether you are making a pallet or truckload charge for your customer, or preparing a quote on available material, ABS will calculate the **lowest cost** of possible charge combinations of raw materials, and still meet alloy specifications. The net result will be to improve your profitability while meeting customer requirements.

ABS is installed by **industry experts**. We will **train** your employees at your site. Brokerage is a competitive industry with unlimited combinations. Let ABS do the complex math, allowing you to concentrate on the next deal.
